

# COLDSTREAM

Since 1949

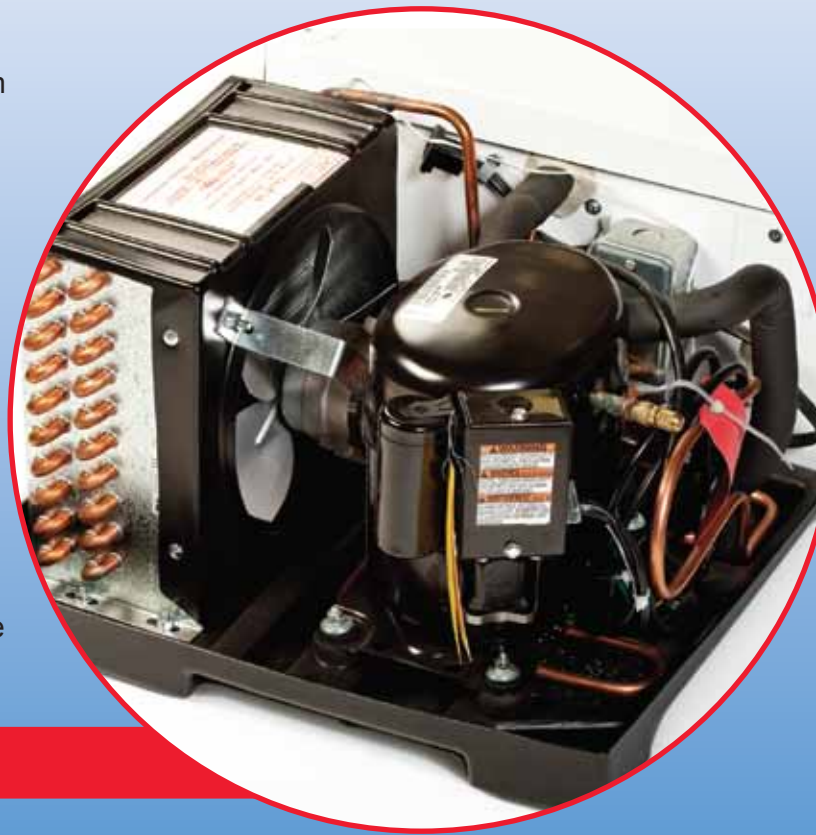

## NOW AVAILABLE

# REPLACEMENT **COLDPACKS** FOR YOUR **COLDSTREAM** UNIT

All RSCP top mount reach-in coolers have Coldstream exclusive coldpack designs.

The refrigeration is separate from the cabinet and can be removed without the need for tools or technician, maintenance becomes simple with this lift off capability. The hot gas condensate pan eliminates the need for a remote drain, and the cooling coil is above the cabinet, which allows for increased interior cooler space.

Replacement Coldpacks can be purchased at a fraction of the cost of replacing a new reach-in, and the cabinet can be left in place.

### **COLDPACK OPTIONS:**

| Part #  | Reach in Model | HP     | Voltage | Cooling    | Refrigerant | Base |
|---------|----------------|--------|---------|------------|-------------|------|
| 2002438 | RSCP24         | 1/3 HP | 115V    | Air Cooled | R134A       | PVC  |
| 2002479 | RSCP48         | 1/2 HP | 115V    | Air Cooled | R134A       | PVC  |
| 2001773 | RSCP 60-72     | 1/2 HP | 115V    | Air Cooled | R22**       | PVC  |

**Coldpacks available in plastic base models.**

**Metal Base\***

\*Metal base currently not available.

\*\*currently being redesigned with R134A (not yet available)
